

The K-Tech Connect Emergency Device is the core unit of the K-Tech Connect system. Installed in the elevator cab, it provides two-way text and video communications during an elevator emergency.

Passengers can answer on-screen questions using the cab's Yes and No buttons, while authorized personnel can view the cab when a compatible USB camera is installed.

Updated for Q4 2026: On-board PoE+ splitter and larger screw terminals for car-panel wiring.

Model No. **KC601-S5CB-4**
